## SUMMARY

Design strategist with 14 years of experience building brand and information systems for companies whose value is technically complex and hard to explain. I work with engineering, industrial, energy, healthcare and tech organizations that have real substance in the product and no structure in how they communicate it. My specialization is Information Design: translating dense technical data, product architectures and business structures into visual systems that non-technical buyers, partners and internal teams can actually use. I combine strategic design methodology with semiotic research, which means the systems I deliver hold up as the company grows instead of needing a redesign every two years.

+15 documented intervention projects across multiple sectors, with B2B, B2C and public-sector clients, including competitive tender processes.

Industry & engineering · hydraulic and electrical infrastructure · energy and lighting · construction · healthcare · food and beverage · hospitality · IT and management technology · fintech · premium retail · import · market research · human resources

## SELECTED CLIENTS

Freelance and agency engagements, 2012 to present: Personal (Telecom Argentina) · Flecha Bus · Envasando · Primicia Yerba Mate · Total Distribuidora · Electro Misiones · Anyway Insumos · Vip Work · Hidra · Estancco · Ingelect · YVY Hotel de Selva · Petri Panadería · Oda Vinoteca · Oda al Vino · Redland · Ámbar Casa de Salud

## CORE CAPABILITIES

**Information Design**
Technical datasheets for multi-stakeholder audiences · Product and system documentation · Complex offering architecture · Technical catalogues and editorial systems · ROI-oriented sales collateral

**Brand & Identity Systems**
Umbrella brand systems and multi-unit brand architecture · Product identity · Design systems and brand guidelines · Packaging systems · Long-term visual consistency across physical, digital and point-of-sale touchpoints

**Design Strategy & Management**
Brand positioning and value proposition definition · Design workflows and process design · Cross-functional alignment between design output and business goals · Direction of multidisciplinary teams of up to 6

**Applied Research**
Semiotic analysis of visual systems · Discourse and audience analysis · Research-based design decisions · Published researcher in editorial design and visual semiotics

## PROFESSIONAL EXPERIENCE

### Senior Strategic Designer
Independent Consultant
2012 – Present

**Strategic design projects** for organizational culture and innovation in industrial companies.
**Specialized in Information Design:** translating complex data and business structures into clear, usable visual ecosystems.
**Advised executive leadership** on brand positioning, communication strategy and commercial campaigns.
**Mobile telephony retail network:** full point-of-sale and communication redesign across 35+ branches, implementing the brand's image standards, with an ongoing client relationship over time.

### Co-Director & Design Strategist
Satélite Agencia
Jul 2018 – Aug 2024

Creative and strategic direction for branding programs in the industrial, healthcare and consumer sectors.
Built design systems and internal workflows to increase team efficiency and align design output with client business objectives.
Developed research-based visual systems designed for long-term brand consistency.
Directed multidisciplinary teams of up to 6 people across branding, identity manuals, product design and digital strategy.

### Corporate Visual Lead
Personal Partner / Electro Misiones
2014 – 2016

Managed corporate visual identity for a regional retail and telecommunications operation with 5+ branches and 40+ years of market presence, in partnership with Personal (Argentina's leading telecom operator).
Integrated design systems across point of sale, print media and digital advertising.
Built communication systems for a long-established organization, ensuring consistency across physical and digital touchpoints.

### Co-Founder & Art Director
Somos Gráficos
2013 – 2015

Co-founded and directed a boutique design studio focused on identity design and visual problem-solving for SMEs.

## ACADEMIC & RESEARCH

### Associate Professor
Universidad de la Cuenca del Plata
2015 – Present
Faculty of Engineering, Tech and Architecture

**Teaches** Semiotics, Graphic Design Workshop I and III, and Final Degree Project Development.
**Directed** 50+ final degree projects, from research and context analysis through to strategic execution and feasibility planning.
**Supervised** 5 teaching assistants.

Institutional Referent for Supervised Professional Practice (2021, 2023), managing the university–industry placement relationship.

### Design Researcher

Published in scientific journals on editorial design and visual semiotics (ISSN).
Presenter at international congresses: AISV (International Association for Visual Semiotics), ELaDDi, DiSUR, APOAVA.
Three competitive research fellowships: UNaM, CIN (National Interuniversity Council), CEDIT.

## EDUCATION

**Master of Design**
Strategy and Innovation Management
Universidad Nacional del Noroeste de la Provincia de Buenos Aires (UNNOBA) · Coursework completed

Modules include Semiotics for Strategic Design Management, Strategy and Design Management, Technology Transfer Management, Design Strategies for Innovative Ventures, Research Methodology.

**Bachelor of Graphic Design**
Universidad Nacional de Misiones (UNaM) · 2008–2012 · GPA 9.12/10 · Gold Medal (highest average, Faculty of Arts)

Postgraduate Program in Writing Practice
Faculty of Art and Design, UNaM · 90 hours

**English** - Advanced
Cambridge First Certificate (FCE)
+9 years of formal study - Saint George Institute · Proyecto Idiomas, Universidad Nacional de Misiones.

## TOOLS & FRAMEWORKS

**Design:** Adobe Creative Cloud (Illustrator, Photoshop, InDesign, Premiere, After Effects) · Figma
**Project Management:** Microsoft Office, Notion, ClickUp, Slack, Google Workspace
**Methods:** Design Thinking, Human-Centred Design, Strategic Roadmapping, Semiotic Analysis, Brand Architecture

## CONTINUING EDUCATION

**AI, data & digital transformation**
AI Fundamentals - IBM SkillsBuild (Credly-verified, 2026) · AI Fundamentals and AI for Research and Insights - Google / Coursera · Designing Magical Experiences with Gen AI - CMU Portugal Academy · Product Management, Business Intelligence, Digital Transformation - Santander Open Academy and Argentine Chamber of Commerce (CAC/Nubiral) · Generative AI - Argentine Ministry of Economy / Accenture

**Selected Projects**

**Industrial packaging manufacturer, Mercosur scale** Brand system and organizational innovation
Identity system and brand manual with 360 communication: social, web, brochure and sales material for activations. The engagement then scaled into strategic design for an internal innovation practice: unit profile, physical space, project pipeline, culture book, internal research and a first-year training programme.

**Hydraulic gates for critical water infrastructure** B2B / B2G, public tenders
Repositioned a patented engineering product from commodity metalwork to operational-continuity asset. Designed a layered tender documentation system readable by three decision-makers with divergent criteria -contractor, site engineer, tendering authority- supported by 3D renders, technical video, ROI brochure and assembly datasheets.

**Corporate importer of international luxury labels** National distribution
Corrected a category error that framed a national distribution platform as a single apparel label. Built a high-neutrality corporate identity system able to hold and endorse the reputation of global luxury houses, with prospecting tools for the sales force and reputation guidelines across retail tiers, structured to absorb new luxury verticals without redesign.

**International wine festival** B2C, spatial intervention
Protected a premium festival's character after its move into a shopping mall. Co-designed the spatial intervention with architects - entrance portal, unified stand system, circulation dividers - alongside a batch-release ticketing microsite and a community-led social strategy connecting the venue to wineries from across Argentina and visitors from Paraguay and Brazil.

**Fintech lending to schoolteachers** National coverage
Designed trust for a segment resistant to fast-lending aesthetics. Semiotic reading of national visual codes produced a brand character built on two archetypes, security graphics derived from official banknote iconography, and an application flow that normalised the submission of sensitive personal data.

**Hydraulic and industrial infrastructure contractor** Regional, B2G
Institutional identity for a young engineering firm competing against long-established structures in public tenders. Packaged technical expertise, prior works and materials into a transparent reliability signal: corporate brochure and sales folder, unified site presence, and an institutional platform. Established the credibility that later enabled the spin-off of a patented product line.

**Electrical infrastructure, lighting and IT services** Commercial group
Portfolio architecture across three unrelated verticals, including a queue management system productised as a standalone offering, turning a transactional supplier relationship into a differentiated service portfolio. Retail design across the company's own branches and the 35+ branches of its mobile telephony network.
